

CANADIAN PAIN CLINIC LISTING

PAIN CLINICS - CANADA - LISTED BY PROVINCE

The list was updated up to March 2015. This list is intended to provide healthcare professional and patient advocate information of multidisciplinary pain treatment facilities (MPTF) across Canada. The list is by no means complete as we only have 88% response rate. The information in this list is based on a search of MPTF in a project (STOPPAIN) and the MPTF listed here does not imply the endorsement or recommendation by the project researchers.

All the public and private funded MPTF in Canada that met the following definition were included. A MPTF was defined in this study as a health care delivery facility staffed with health care professionals who were specialized in the diagnosis and management of patients with chronic pain. To be included in the study, the MPTF (1) advertised itself as a pain clinic or a pain centre and/or specialized multidisciplinary services for the diagnosis and management of patients with chronic pain; and (2) staffed with a minimum of three different health care disciplines (whose services were available and integrated within the pain clinic or centre) including at least one medical speciality. Examples would be a MPTF staffed with anesthesiologist, family physician and nurse; or a MPTF with neurologist, acupuncturist and nurse. We excluded those MPTF that managed only cancer pain patient.
